FOREWORD

The annual graduate follow-up survey collects information from graduates of regular and non-regular training programs approximately one year following graduation. The information gathered provides valuable feedback on the success of graduates in the labour market and is an important tool for decision-makers. This tool, along with other sources, is incorporated into the Department's planning process.

This report presents the findings of the Survey of 1999 New Brunswick Community College Graduates. The survey was conducted during a two-week period, June 11-24, 2000 with 1,964 graduates. This represents a response rate of 80%. Survey results indicated that graduates of the Class of 1999 were very successful in locating employment as this year's employment rate of 89% is the highest rate ever achieved by NBCC.

In response to feedback received from the community colleges and others, the survey is continually modified to reflect information needs. New sections can be found on motivations for enrolling at NBCC/CCNB, satisfaction with salary received, peer tutoring and greater analysis of gender differences in wages.

The Department of Training and Employment Development is pleased to present a new design for the cover of our graduate follow-up survey. We wish to thank Communications New Brunswick for their efforts.

The Department would like to thank the New Brunswick Community College graduates who participated in this survey; their input has been invaluable.

Graduate follow-up survey results will be located on our website at the following location: **http://www.gnb.ca/0126/0001e.htm.**

As always, your comments and suggestions are welcome. Please forward all communication on this year's survey to:

Executive Summary

The follow-up survey of the Class of 1999 from the New Brunswick Community College generated information from 1,964 graduates, representing 80% of the 2,456 graduates to be contacted for this survey.

The points which follow present key information obtained through the 2000 survey.

- The employment rate for graduates one year following their graduation was 89%, the highest level reported since the start of the graduate follow-up surveys.
- The employment rate for female graduates increased from 89% in 1999 to 90% in 2000.
- The employment rate for male graduates was 87%, an increase of three percentage points from the 84% reported in 1999.
- The unemployment rate for graduates decreased from 12.5% in 1999 to 11.3% in 2000.
- Overall, the percentage of related employment since graduation decreased from 87% in 1999 to 84% in 2000.
- The percentage of graduates in self-employment was 2% in 2000, two percentage points lower than reported in 1999.

Consistent patterns over the 1999 and 2000 surveys follow.

- The level of related employment *in the reference week*, 81%, remained the same as reported in 1999.
- The percentage of employed graduates working in New Brunswick (93%) has remained relatively consistent since 1994.
- The majority of employed graduates (90%) continued to be in work situations in which they were working for one employer in the reference week.
- The economic differences between the wages of men and women continued to be evident in 2000 with women in full-time positions earning approximately 80% of the full-time wages of their male counterparts; women working full-time in positions related to their training also earned about 80% of the average wages of male graduates in similar positions. In 1999, women earned 77% of the average wage of male graduates. While wage disparity continues, data suggest that female graduates are moving toward wage parity with their male counterparts.

I INTRODUCTION

Follow-up surveys with graduates of the New Brunswick Community College have been conducted since 1983. For the past eleven years the survey has been conducted by telephone. The survey is conducted annually with graduates of regular and non-regular programs of the College. In this year's survey, interviews were completed with 1,964 graduates from a total listing of 2,456 graduates of the 1999 school year for whom contact information was available.

The data supplied by these surveys provides valuable feedback on the success of New Brunswick Community College graduates in the labour market which, in turn, serves as an important indicator of how well the training provided by the NBCC system corresponds to the demands of the labour market.

This report provides detailed information gathered from the Survey of 1999 New Brunswick Community College Graduates through five sections which are summarized in the material which follows.

- **Section II** presents information related to the way in which the 2000 survey was conducted and provides a profile of the graduates contacted with a comparison with the overall population of graduates.
- **Section III** presents the information highlights from the 2000 survey.
- **Section IV** presents fact sheets which report the survey information on a program-by program basis.
- **Section V** presents labour market information on a program-by-program basis.
- **Section VI** presents the evaluations provided by graduates.

A list of terminology used in this report is provided in Appendix A.

II Methodology

II METHODOLOGY

The Survey of 1999 Graduates of the New Brunswick Community College (NBCC) was Guided by researchers from the Planning Branch of the Department of Training and Employment Development (the Department). Any comments or questions about the information contained in this document should be forwarded to the Department.

In June 2000, the Department generated a data base with background and current contact information for 2,470 graduates from the Class of 1999 for the NBCC. The background data and required contact information was retrieved from the Department's Student Information System (SIS).

Prior to the start of the survey (in June 2000), the data base was reduced by five (5) graduates for whom no current telephone numbers were available. During the data collection period, nine (9) respondents indicated that they had not completed their program of study in 1999. Following removal of these names from the data base, there were 2,456 potential contacts for the Class of 1999. The 1,964 interviews completed represents 80% of the total number of graduates who were eligible to participate in this survey.

As in previous surveys, graduates were asked about their activities during a specific week of the year (the reference week). Reference week information is an indicator of graduates' current activities. *The reference week for the 2000 survey was June 4 – June 10, 2000.*

In addition to the reference week information and the information collected on activities since completing training, graduates were also asked to evaluate their NBCC training program and various facilities and services available at the college.

The overall approach to the Graduate Follow-Up Survey was changed in 1996. Previously, surveys were conducted in March, capturing information from graduates of the previous academic year. The change in the time of the reference week should be kept in mind when comparing the results from the surveys in 1996 - 2000 to those conducted in previous years. For example, the question asking respondents if they were studying during the reference week gave very different results in 1996 - 2000 compared to previous years. These differences are understandable considering that most people enrolled in post-secondary institutions would be attending classes in March but not in June.

The telephone interviews with graduates were conducted by Baseline Market Research in Fredericton, NB immediately following the reference week.

The 2000 survey response rate of 80% was similar to the 81% for the 1999 survey. Over the last two years it has been more difficult to achieve the 80% response rate because there has been an increase in the number of graduates for whom current telephone numbers cannot be identified In 2000, 12% of the graduates could not be contacted because the numbers provided were not in service or because graduates were unknown at the number.

II METHODOLOGY

The table which follows presents a summary of response rates for the surveys over the 1995 – 2000 period. Prior to 1997, the data is for graduates of regular programs only.

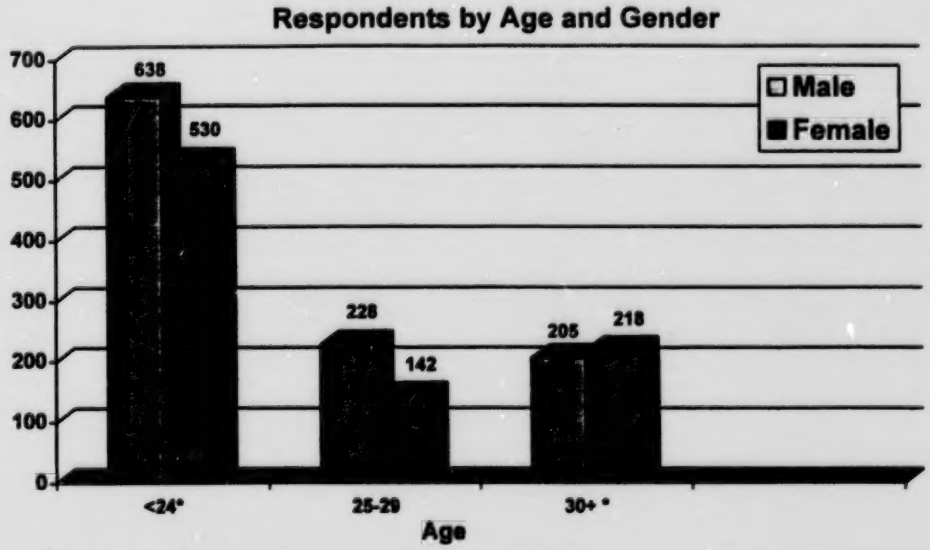
Response Rates

	Graduates	Respondents	Response Rate
2000 Regular/Non-Regular	2,456	1,964	80%
2000 Regular	2,203	1,774	81%
1999 Regular/Non-Regular	2,352	1,881	80%
1999 Regular	2,155	1,738	81%
1998 Regular/Non-Regular	2,493	1,982	80%
1998 Regular	2,195	1,767	81%
1997 Regular/Non-Regular	2,558	2,068	81%
1997 Regular	2,110	1,729	82%
1996 Regular	2,321	1,995	86%

Measuring labour market participation is a primary objective of the graduate follow-up surveys. Because of the importance of this information, an attempt was made to determine the extent to which a change in the time of the reference week (initiated in 1996) affected the results of reported labour force activity. The potential effects were initially monitored in the 1996 survey and the monitoring has continued through the current survey. The information from the current survey is presented in the table which follows. The data presented indicate that the employment rates for March and June were the same, suggesting that seasonal variations did not exist for the Class of 1999 in 2000. It is noted that the percentage of graduates in the labour force increased over March – June.

Labour Market Indicators	2000 Survey of NBCC Graduates			
	June 2000	Percentage	March 1999	Percentage
Labour Force	1,874	–	1,772	–
Labour Force Participation Rate	95%	–	93%	–
Employed	1,662	89%	1,577	89%
Unemployed	212	11%	195	11%

The chart which follows presents an overview of the gender distribution for graduates contacted.



* Birth year information was not available for 3 graduates

The table which follows presents a comparative summary of graduates contacted in follow-up surveys over the past 5 years. Prior to 2000, there had been significant increases in the percentage of graduates 25 years of age or older and significant increases in the percentage of female graduates; however, in 2000, those trends were not present.

Demographics

Gender	Male	Female
2000 Regular/Non-Regular	55%	45%
2000 Regular	55%	45%
1999 Regular/Non-Regular	52%	48%
1999 Regular	52%	48%
1998 Regular/Non-Regular	50%	50%
1998 Regular	51%	49%
1997 Regular/Non-Regular	54%	46%
1997 Regular	57%	43%
1996 Regular	59%	41%

Age	24 and under	25 and over
2000 Regular/Non-Regular	60%	40%
2000 Regular	63%	37%
1999 Regular/Non-Regular	59%	41%
1999 Regular	61%	39%
1998 Regular/Non-Regular	55%	45%
1998 Regular	59%	41%
1997 Regular/Non-Regular	51%	49%
1997 Regular	58%	42%
1996 Regular	61%	39%

III Survey Highlights

The information in this section presents a summary of research findings for the Class of 1999 along with a comparison of key variables in relation to research findings from previous years.

LABOUR FORCE INFORMATION

The labour force participation rate for the male graduates of regular programs (96%) increased by one percentage point over that reported in 1999. Overall participation rates remained constant at 95% over 1999 – 2000.

Labour Force Participation Rate

	Total	Male	Female
2000 Regular/Non-Regular	95%	95%	96%
2000 Regular	96%	96%	96%
1999 Regular/Non-Regular	95%	95%	96%
1999 Regular	95%	95%	96%
1998 Regular/Non-Regular	96%	96%	96%
1998 Regular	96%	96%	96%
1997 Regular/Non-Regular	96%	97%	94%
1997 Regular	95%	97%	94%
1996 Regular	96%	95%	96%

The table which follows presents information to compare the findings from the Survey of 1999 NBCC Graduates to labour market information for the population of New Brunswick.

III SURVEY HIGHLIGHTS

Labour Market Indicators	Labour Force Survey	2000 Survey of NBCC Graduates		
		Overall	Regular Programs	Non-Regular Programs
Labour Force	368,800	1,874	1,695	179
Employed	331,200	1,662	1,505	157
Unemployed	37,600	212	190	22
Participation Rate	61.1%	95%	96%	94%
Unemployment Rate	10.2%	11.3%	11.2%	12.3%

*Statistics Canada Labour Force Survey June 2000, seasonally adjusted. It is noted that the unadjusted unemployment rate for youth, 15-24 was 15.2% in June 2000.

The 89% employment rate for the 1999 graduates is the highest ever reported for the graduate surveys. The unemployment rate calculated for the 2000 Survey indicates that the graduates had a marginally lower (1.1%) unemployment rate than that calculated for the overall province; however, the unemployment rate for graduates was significantly lower (3.9%) than the youth unemployment rate of 15.2% (unadjusted) for June 2000.

The table which follows summarizes employment rates over 1996 - 2000 by gender. The information indicates that female graduates continue to evidence a higher, overall employment rate than male graduates.

Employment Rate

	Total	Male	Female
2000 Regular/Non-Regular	89%	87%	90%
2000 Regular	89%	87%	91%
1999 Regular/Non-Regular	88%	84%	91%
1999 Regular	88%	84%	91%
1998 Regular/Non-Regular	88%	86%	89%
1998 Regular	88%	87%	88%
1997 Regular/Non-Regular	84%	83%	86%
1997 Regular	83%	82%	85%
1996 Regular	81%	80%	82%

As evidenced in the table which follows, most graduates continue to be employed in New Brunswick.

Graduates Employed in New Brunswick

2000 Regular/Non Regular	93%
2000 Regular	93%
1999 Regular/Non Regular	93%
1999 Regular	93%
1998 Regular/Non-Regular	92%
1998 Regular	92%
1997 Regular/Non-Regular	94%
1997 Regular	95%
1996 Regular	91%

ADDITIONAL EDUCATION/TRAINING FOR GRADUATES

In 2000, approximately 9% of graduates were attending school at the time of survey contact. This represents an increase of one percentage point over that reported in the 1999 survey.

Graduates Taking Further Study

2000 Regular/Non Regular	9%
2000 Regular	8%
1999 Regular/Non-Regular	7%
1999 Regular	7%
1998 Regular/Non-Regular	6%
1998 Regular	6%
1997 Regular/Non-Regular	5%
1997 Regular	6%
1996 Regular	4%

III SURVEY HIGHLIGHTS

The percentage employed since graduation has increased slightly over the 1996 – 2000.

Total With Employment Since Completing Training

2000	Regular/Non-Regular	97%
2000	Regular	98%
1999	Regular/Non-Regular	97%
1999	Regular	97%
1998	Regular/Non-Regular	96%
1998	Regular	96%
1997	Regular/Non-Regular	95%
1997	Regular	95%
1996	Regular	96%

OVERALL EMPLOYMENT FOR GRADUATES

The percentage of graduates employed in positions related to their training since graduation decreased by three (3) percentage points over 1999 – 2000.

Total With Related Employment Since Completing Training

2000	Regular/Non-Regular	84%
2000	Regular	84%
1999	Regular/Non-Regular	87%
1999	Regular	87%
1998	Regular/Non-Regular	84%
1998	Regular	84%
1997	Regular/Non-Regular	82%
1997	Regular	82%
1996	Regular	81%

GEOGRAPHIC LOCATION OF GRADUATES

In June 2000, 74% of graduates were residing in New Brunswick. Approximately 13% of graduates had lived outside New Brunswick since graduation. Among those who had lived outside the province (n=260), the majority (74%) had left the province for employment. The percentage of those who left for employment and had employment prior to relocation increased by five (5) percentage points over 1999 – 2000.

Percentage of Graduates...

	Currently living in same community as before NBCC...	Lived outside NB at some point since completing training...	Of those who left - the percentage who left for employment reasons...	Of those who left for employment reasons - the percentage with a job to go to...
2000	74%	13%	74%	52%
1999	73%	16%	70%	47%

Graduates Currently Living in Same Community as before NBCC by College

Bathurst	74%	Miramichi	62%
Campbellton	81%	Moncton	69%
Craft and Design	65%	Saint John	80%
Dieppe	70%	St. Andrews	72%
Edmundston	70%	Woodstock	78%

Reference Week Employment

The following tables present an overview of information which describes employment during the reference week.

Reference Week Employment Summary

Total Employed	One Employer	More than one Employer	One Employer and Self-employed	Self-employed
1,662	90%	8%	<1%	2%

The employment status for primary employment in reference week indicates minor changes over the 1999 – 2000 surveys.

Employment Status In Reference Week

	Permanent	Temporary	Self-Employed
2000 Regular/Non-Regular	69%	29%	2%
2000 Regular	69%	30%	1%
1999 Regular/Non-Regular	68%	30%	2%
1999 Regular	68%	30%	2%
1998 Regular/Non-Regular	70%	27%	3%
1998 Regular	71%	26%	3%
1997 Regular/Non-Regular	73%	22%	5%
1997 Regular	73%	23%	4%
1996 Regular	75%	22%	3%

The percentage of graduates employed in positions related to their training appears to have remained at about the same level over the past three years. Over the 1996 – 2000 period, the percentage in related employment has increased from 74% in 1996 to 81% in 2000.

Relation of Reference Week Work to Training

	Directly Related	Indirectly Related	Not at All Related
2000 Regular/Non-Regular	63%	18%	19%
2000 Regular	62%	18%	20%
1999 Regular/Non-Regular	63%	18%	19%
1999 Regular	63%	18%	19%
1998 Regular/Non-Regular	62%	16%	22%
1998 Regular	62%	16%	22%
1997 Regular/Non-Regular	62%	15%	23%
1997 Regular	60%	16%	24%
1996 Regular	55%	19%	26%

Employment Comparison - Graduates of Co-Op Programs

	Total in the Labour Force	Employment Rate	Relationship of Employment to Training		
			Directly Related	Indirectly Related	Not at all Related
All graduates	1,662	89%	63%	17%	19%
Co-Op	70	83%	64%	31%	5%

III SURVEY HIGHLIGHTS

The percentage of graduates employed in full-time positions has increased by two points over that reported in 1999. Over the 1996 – 2000 period, there had been an increase of six percentage points in full-time employment for graduates of regular programs.

Full and Part-Time Employment in Reference Week

	Full-time			Part-time		
	Overall	Females	Males	Overall	Females	Males
2000 Regular/Non-Regular	93%	89%	96%	7%	11%	4%
2000 Regular	93%	90%	97%	7%	10%	3%
1999 Regular/Non-Regular	91%	86%	96%	9%	14%	4%
1999 Regular	91%	86%	96%	9%	14%	4%
1998 Regular/Non-Regular	90%	86%	95%	10%	14%	5%
1998 Regular	90%	85%	94%	10%	15%	6%
1997 Regular/Non-Regular	88%	80%	93%	12%	20%	7%

1996 Regular	87%	78%	93%	13%	22%	7%

On average, graduates worked 40.4 hours in the reference week for an average wage of $467. The table which follows provides more detailed information on wages reported by gender and by employment status.

Weekly Wages for Full and Part-Time Employment in Reference Week by Gender

	Full-time			Part-time		
	Overall	Females	Males	Overall	Females	Males
Permanent	$492	$422	$537	$221	$226	$203
Temporary/Casual	$473	$438	$517	$195	$210	$147
Self-Employment	$650	$333	$755	$153	$153	--

Graduates were asked for their perceptions about the wages they earned in the reference week. Overall,

- 6% of employed graduates reported that their wages were "much better" than those of others in similar jobs;
- 20% reported that their wages were better;
- 57% reported that their wages were the same as those for others in similar positions; and
- 17% reported that their wages were worse (15%) or much worse (2%) than those in similar positions.

The table which follows links the perceptions about wages with the average gross wages earned in the reference week.

Satisfaction With Wages

Perception Of Wages	Average FT Wage	Average PT Wage
Overall Average	$488	$209
Much Better	$633	$334
Better	$538	$249
Same	$478	$188
Worse	$422	$207
Much Worse	$394	$87

The data suggest a clear link between the wages earned in the reference week and perceptions about those wages.

Time in Reference Week Job

	1-10 Weeks	11-30 Weeks	31-50 Weeks	51+ Weeks
2000 Regular/Non-Regular	15%	24%	44%	17%

Industrial Classification of Employment

Starting with the 1999 Survey, industries in which graduates were employed in the Reference Week were coded according to the North American Industrial Classification System (NAICS). Should researchers want to compare employment in industrial sectors for 2000 with other graduate survey data, a conversion program would be required. Conversion programs are available through Statistics Canada.

Top Ten Industries - Overall

NAICS	Industrial Sector	Total	Full-time	FT $	Part-time	PT $
	ALL GRADUATES	**1,662**	**96%**	**$488**	**4%**	**$209**

Gender Differences in Wages

Each graduate survey has identified gaps between the overall wages of male and female graduates. Since it has been demonstrated that males and females tend to be employed in different occupations, gaps may have been expected; however, as the table which follows demonstrates, a similar wage gap often, but not always exists, when male and female graduates are employed in the same NOC (National Occupational Classification) classifications.

Average Full-Time Wages for Male and Female Graduates in Similar Positions

Occupation (NOC)	Full-Time Weekly Salary		
	Males	Females	Female Wage Gap/Gain
OVERALL	**$535**	**$427**	**-20%**
Customer Service Rep (1453)	$431	$422	-2%
Dispatchers (1475)	$506	$438	-13%
Computer Programmers (2163)	$643	$547	-15%
Biological Technologists (2221)	$517	$417	-19%
Respiratory Therapists (3214)	$765	$601	-21%
Graphic Designers (5241)	$516	$387	-25%
Retail Trade Supervisors (6211)	$327	$434	33%
Cooks (6242)	$392	$308	-21%
Retail Salespeople (6421)	$373	$359	-4%

Unemployment

Overall, 11.3% of graduates contacted were unemployed in the reference week. The table which follows demonstrates that the level of unemployment varied considerably when reviewed in relation to the college attended. Information on rates within programs is presented in Section V.

Unemployment Rate by College

Bathurst	16%	Miramichi	22%
Campbellton	4%	Moncton	7%
Craft and Design	7%	Saint John	9%
Dieppe	10%	St. Andrews	12%
Edmundston	20%	Woodstock	13%

Unemployed Graduates Willing to Relocate by College

Bathurst	72%	Miramichi	92%
Campbellton	68%	Moncton	75%
Craft and Design	75%	Saint John	67%
Dieppe	77%	St. Andrews	74%
Edmundston	95%	Woodstock	47%

All graduates not working in the reference week were asked for the main reason for their lack of employment.

Reasons For Not Working

Lack Of Jobs	41%
Lack of Jobs Related to NBCC Training	14%
In an Education/Training Program	13%
Temporary Lay-off/Awaiting Job Start	12%
Position recently ended – not looking at moment	11%
Various Other Reasons	4%
Positions Available Require More Training	2%
Temporary Illness	2%
Temporary Family Responsibilities	1%
	100%

Return to School for Additional Training/Education

The 166 respondents attending school in the reference week provided the following reasons for their return to an education or training program:

- to upgrade existing skills (54%)
- to get a better job (13%)
- to learn a new trade (13%)
- to get a university degree (12%);
- inability to find employment (3%) or
- other reasons or multiple reasons (5%).
-

Employment Since Graduation

Overall, the average number of jobs held since completing training was 1.8. In 1999 the overall average was 1.9 jobs since graduation.

Motivations for Community College Enrollment

Beginning with the 1999 survey, all graduates were asked why they had decided to pursue their training at the NBCC rather than through a university or private training program. Overall,

- 23% indicated that the NBCC offered a less expensive alternative than either a university or a private program;
- 23% chose the NBCC because it was the only place which offered the type of training desired;
- 15% chose the NBCC because of the shorter time requirements for completion of a program of study;
- 8% based their selection on the reputation of the College;
- 8% based their decision on the location of a particular College;
- 6% based their selection on the job prospects which would exist upon completion of an NBCC program;
- 3% indicated that they had lacked the marks or other requirements for entry to a university program;
- 1% indicated that the course was sponsored by an employer; and
- 13% cited other or a combination of reasons.

III SURVEY HIGHLIGHTS

When asked why they had selected a particular College for their program of study, the following reasons were cited:

- the convenience of the location (46%);
- the particular program was available only at the location selected (30%);
- the reputation associated with the College (7%);
- the language of instruction at the College (7%);
- recommendations of friends/relatives (3%);
- lower tuition costs (2%); and
- various other reasons (5%).

Ninety-five percent of graduates were accepted to the NBCC in the year in which they made their initial application.

Overall, 79% of graduates would select the same field of study, were they making the decision about enrollment today.

Prior Learning Assessment and Recognition and Credit Transfer Services

Graduates were asked questions to determine their awareness, use and evaluation of the PLAR and Credit Transfer Services. The material which follows provides a summary of the information collected.

Overall:

- 51% of graduates reported that they were aware of these services; and
- 49% were not aware of these services.

In 1999, 47% of graduates reported awareness of PLAR.

Among the 49% who could not recall these services (n=970):

- 29% believed that these services may have been of use; and
- 71% did not see a use for these services.

Among those who were aware of these services (n=990):

- 74% heard about PLAR through staff at the NBCC;
- 16% heard about these services through friends; and
- 10% heard about these services through other means.

Among those who were familiar with the services (n=885):

- 24% had applied for Credit Transfer; and
- 12% had applied for a Prior Learning Assessment.

Among the 273 who had applied for one of these services, or 14% of the graduates contacted, 196 received an exemption from courses based on prior experience or prior academic work at another institution. The exemptions granted resulted in a reduction of tuition for 14 graduates and a reduced course load for 172 and 25 people reported other effects.

The 196 graduates who received exemptions provided the following evaluations of the services they received:

- 40% were very satisfied with the services provided;
- 55% were satisfied;
- 4% were dissatisfied and
- 1% were very dissatisfied.

Three of those who received an exemption did not evaluate the services they received.

Peer Tutoring

Five percent (5%) of the graduates contacted used the peer tutoring system at the college. When asked for their evaluation of the effectiveness of the assistance provided through peer tutoring:

- 60% of those who used this service (n=105) provided a good rating;
- 27% provided a rating of excellent; and
- 12% indicated that peer tutoring was fair (11%) or poor (1%).

III SURVEY HIGHLIGHTS

Post Program Artistic Involvement of NBCCD Graduates

For the 2000 Survey, graduates of the College of Craft and Design (n=17) were asked about their post-training involvement with the arts community in New Brunswick. The material which follows provides a summary of the information collected.

- Since graduation, 18% of the graduates contacted have applied to the NB Arts Board or the Canada Council for funding to promote or prepare their craft. The three who applied received an award.

- Since graduation, 29% of those contacted reported that they have contributed to the arts through exhibits, donations or in other ways.

- During the reference week, 41% of those who had completed a program through the College of Craft and Design were practicing their craft or preparing for an exhibit for which they were not paid.

The sections which follow present information about graduates on a program-by-program basis.

IV Survey Results by College and Program

IV SURVEY RESULTS BY COLLEGE AND BY PROGRAM

In 1998, 39% of NBCC programs had 9 or less graduates. In 1999, 22% of programs had 9 or less graduates.

The following section contains a fact sheet for the Class of 1999, a fact sheet for each college and fact sheets for all programs for which more than 3 graduates were interviewed. Information is presented first in summary form if the program is offered in more than one location, followed by information on the program for each college.

The programs which follow, for which graduates were contacted, have been excluded from the presentation because of the small number of graduates reached (3 or less). Although excluded from this section, labour market information for these programs may be found in Section V.

VI Graduate Assessments

VI GRADUATE ASSESSMENTS

In the tables which follow, the percentages for each assessment (excellent, good, fair and poor) are based on responses from those who actually used the services. The final column in these tables (not assessed/not used) is presented for informational purposes. Overall, the use of services through the registrars' office, the library and issues related to student life activities were least likely to be evaluated by graduates.

Appendix A

Terminology

NBCC

The New Brunswick Community College is a network of ten colleges situated throughout the province of New Brunswick.

Average Weekly Earnings

Refers to the average of the gross earnings that graduates reported for the reference week. The average weekly earnings are reported for each program and for each college where the program is offered. The figures presented are based on earnings reported by graduates who indicated that their employment was either directly or indirectly related to their training.

Employed

The number of respondents who had a job during the reference week.

Employment

Defined in terms of full-time/part-time and permanent/temporary as follows:

Full-time	Employment of 30 hours or more per week.
Part-time	Employment of less than 30 hours per week.
Permanent	Employment which has no prearranged termination date.
Temporary	Employment which ends at a prearranged date.

Employment Rate

The number of employed graduates as a percentage of those in the labour force.

Employment Related to Training

Employed graduates were asked about the extent to which their employment during the reference week was related to their training program. Options presented to the respondent included directly related, indirectly related and not at all related.

Related Employment

Includes employment that graduates reported as either directly related or indirectly related to their training program. *Directly related* means that graduates were in jobs for which their training programs had been designed. *Indirectly related* means that graduates were in jobs that required at least some of the skills that were acquired during their training program.

Not at all related

Means that graduates were in jobs that did not require any of the skills that were acquired during their training program.

Graduate Population

Graduates of regular and non-regular training programs that were twenty weeks or more in duration and terminated between January 1, and December 31, 1999.

Labour Force

In the context of this survey, Labour Force is composed of respondents who were either employed or unemployed but looking for work during the reference week.

Not in the Labour Force

Respondents who were not working and not looking for work, during the reference week.

Labour Force Participation Rate

The percentage of respondents who were actively participating in the labour force during the reference week (based on the total number of respondents).

Labour Force Survey

A monthly survey by Statistics Canada which collects labour force information from a representative sample of the working age population.

NAICS (North American Industrial Classification System)

NAICS was used to categorize the industrial sectors/industries in which graduates were employed in the reference week. Fact sheets list the top three industries for employment. If the percentage of respondents is equal across occupations, the three most closely related to the training completed are listed.

NOC (National Occupational Classification)

The National Occupational Classification was used to categorize the kind of work done by graduates. The top three responses are given. If the percentage of respondents in each occupation is equal the three that appear most relevant to the program content are listed.

Programs

Regular

Programs that operated throughout the year on a year-to-year basis. Regular training programs are funded through the departmental budgetary process. Regular training programs are listed in the annual New Brunswick Community College Calendar. (R=Regular)

Non-Regular

Programs that are offered through the New Brunswick Community College that are not part of the regular program listing in the NBCC Calendar. These programs may or may not have the same content as regular training programs of the same name. (NR=Non-Regular)

Co-Op

Cooperative Education Programs integrate periods of classroom study with periods of training in related work. Each work situation is developed and approved by the College as a suitable learning situation. Co-Op trainees are placed in productive work, receive wages and have their progress monitored by the employers and representatives of the College. (Co-Op)

Reference Week

The week of June 4 – 10, 2000 served as the reference week for this survey. During the survey all graduates were asked about their activities during this week.

Response Rate

The number of respondents as a percentage of the number of graduates.

Self Employed

Someone who is working but has no employer other than her/himself.

Total Employment Since Graduation

The total number of graduates who reported that they had been employed, at some time, since completing their training at the NBCC.

Relation of Employment Since Graduation to Training

The percentage of graduates who reported that they held at least one employment positions since graduation which was either directly or indirectly related to their training program at the NBCC.
